

This shows that the ash drawer housing has to be flush with the face of the end of the stove. It must not be recessed. When the drawer closes the face of the drawer must seal all around.

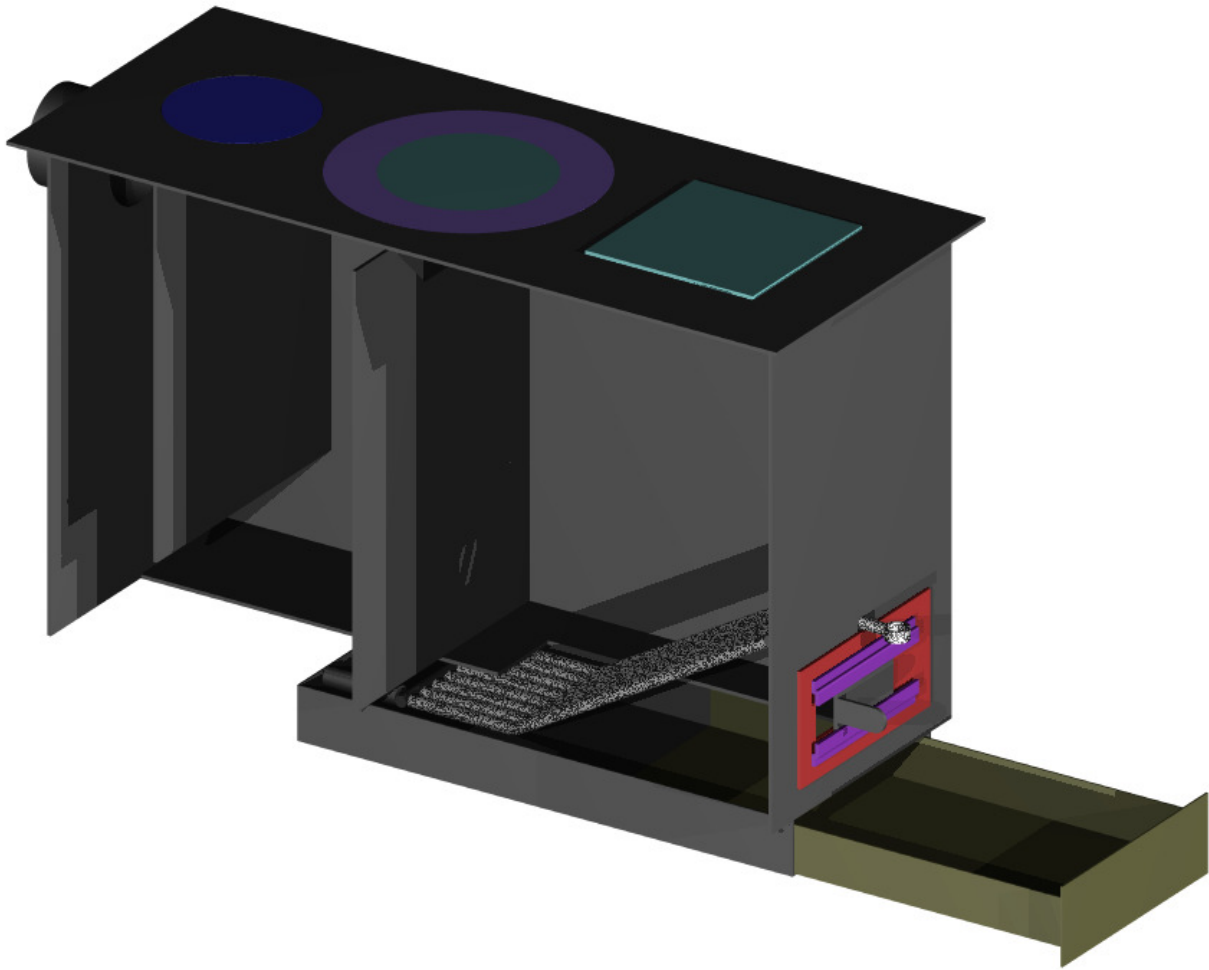

All the bricks are installed. The air controller is in partially opened position. The orange door is to be hinged on the right side and a latch fitted on the left.

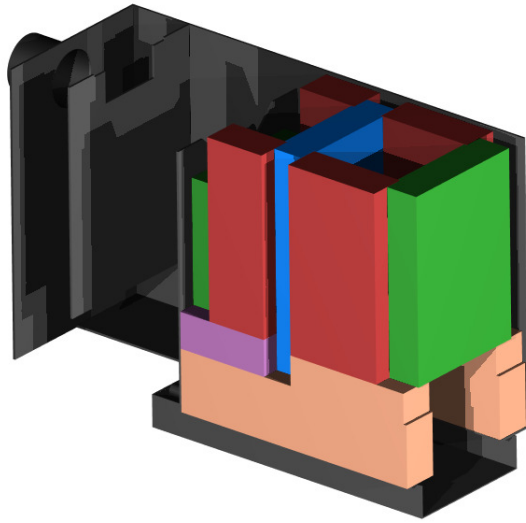

Side Removed

All the metalwork.

Bricks of the same general shape are the same colour.

This sequence removes them, one by one, in the order they were placed into the stove body.
